विभाग अ (PART A) MECHANICAL ENGINEERING -AUTOMOBILE ENGINEERING 1. The strain energy stored in a body, when suddenly loaded, is ______ the strain energy stored when load is applied gradually. (1) equal to 1/2 $(\mathbf{2})$ (3) twice (4) 4 times 2. The design of a thin cylinder shell is based on (1)hoop stress (2)arithmetic mean of the hoop and longitudinal stress (3) geometric mean of the hoop and longitudinal stress (4)longitudinal stress 3. The bending moment on a section is maximum where shear force is (1)minimum (2)maximum (3) changing sign (4)zero 4. When a bar is subjected to a change of temperature and its deformation is prevented, the stress induced in the bar is tensile stress (1)(2) compressive stress (3)shear stress thermal stress (4)5. Hooke's law holds good up to Yield point (2)**Elastic** limit (1) (3)Plastic limit (4) Breaking point The Poisson's ratio for steel varies from 6. 0.23 to 0.27 0.25 to 0.33 (1) (2) 0.32 to 0.42(3)0.31 to 0.34(4)The point of contraflexure is a point where 7. bending moment changes sign shear force changes sign (1)(2)bending moment is maximum shear force is maximum (4) (3)SPACE FOR ROUGH WORK

3

Α

P.T.O.

- 8. Factor of safety is defined as the ratio of
 - (1) ultimate stress to working stress
 - (2) working stress to ultimate stress
 - (3) breaking stress to ultimate stress
 - (4) ultimate stress to breaking stress

9. The plane of maximum shear stress has normal stress that is

- (1) maximum (2) minimum
- (3) zero (4) None of the above

10. Bending moment M and torque T is applied on a solid circular shaft. If the maximum bending stress equals to maximum shear stress developed, then M is equal to

- (1) T/2 (2) T (3) 2T (4) 4T
- 11. The slope at the free end of a cantilever carrying a 'UDL', W N/m over a span L is
 - (1) $\frac{WL^2}{24 EI}$ (2) $\frac{WL^2}{48 EI}$ (3) $\frac{WL^4}{8 EI}$ (4) $\frac{WL^3}{6 EI}$
- 12. In short column failure occurs by
 - (1) Pure buckling
 - (2) Combination of bending and direct compression
 - (3) Direct compression only
 - (4) None of the above

13. The diameter of the core circular column of diameter 'd' under any load shall be(1) d/8(2) d/6(3) d/4(4) d/2

14. A sudden change in shear force diagram between any two points indicates that there is

- (1) Point load at both the points
- (2) No loading between two points
- (3) UDL between two points
- (4) Uniformly varying load between two points

- 45. Cylindrical type cam is one
 - (1) with cylindrical roller follower
 - (2) with cylindrical shape of follower
 - (3) with circumferential contour cut in surface of cylinder which rotates about its axis
 - (4) with circular type of motion of follower
- 46. Dynamics of machine deals with
 - (1) the relative motion between the parts neglecting the consideration of forces
 - (2) the forces acting on the parts of the machines
 - (3) the apparatus for applying mechanical power
 - (4) the number of inter-related parts, each having a definite motion

47. A disc is spinning with angular velocity ω rad/sec about the axis of spin. The couple applied to the disc causing precision will be : where ω_p = angular velocity of precision of axis of spin and I = mass momentum inertia of disc.

(1)	$\frac{1}{2}$ I ω^2	(2)	I ω^2
(3)	$\frac{1}{2}$ I $\omega \omega_p$	(4)	Ιωω _p

48. A Pentagraph is a mechanism or kinematic arrangement comprising

- (1) a lower pair (2) two lower pairs
- (3) three lower pairs (4) 10 links

49. The maximum efficiency of screw jack is $(\mu = \tan \phi)$

(1) $\frac{1 - \sin \phi}{1 + \sin \phi}$	(2) $\frac{1 + \sin \phi}{1 - \sin \phi}$
$(3) \frac{1 - \tan \phi}{1 + \tan \phi}$	$(4) \frac{1 + \tan \phi}{1 - \tan \phi}$

50. A differential gear in an automobile is a

- (1) simple gear train (2) epicyclic gear train
- (3) compound gear train (4) None of the above

Р.Т.О.

विभाग क (PART C) AUTOMOBILE ENGINEERING

- 151. The load carrying capacity of a tyre refers to
 - (1) Aspect ratio (2) Ply rating and its size
 - (3) Type of rubber (4) Tyre pressure

152. The purpose of torque convertor in automobile is

- (1) Automatically multiplying engine torque
- (2) Automatically multiplying engine speed
- (3) Automatically control the speed of engine
- (4) Automatically multiplying vehicle torque

153. X-member of a car frame ensures improved

- (1) bending strength of side members
- (2) resistance to vertical shock loads acting simultaneously on both front wheels
- (3) resistance to side force due to transverse wind load
- (4) resistance of wearing and torsional strength of front end of frame

154. In the integral type of power brake, the diaphragm acts directly on the hydraulic piston in the

- (1) master cylinder (2) wheel cylinder
- (3) multiplier unit (4) None of the above

155. In the transmission, the reverse idler gear always meshes with

- (1) counter shaft drive gear (2) counter shaft low gear
- (3) main shaft reverse gear (4) counter shaft reverse gear

156. Slip joint in automotive driveline is used for

- (1) accommodating change in length of driveshaft
- (2) connecting the driveshaft to gear box
- (3) damping the vibrations of drive train
- (4) transmitting the torque

157. The crumple zones of automotive body

- (1) reduce the production cost
- (2) increase aesthetic appeal of a vehicle
- (3) absorb shock during collision
- (4) reduce interior noise in a vehicle

SPACE FOR ROUGH WORK

158. Inward tilt of front wheels of a vehicle, from vertical, when viewed from the front,

(2)

(4)

castor

camber

(3)

159. Torsional coil springs used in automotive clutch plate (1)ensure smooth engagement of clutch assembly **(2)** damp engine torsional vibrations (3)are provided for applying axial force on the pressure plate (4) do not provide damping at all 160. Checking engine oil level before starting a long journey is an example of (1)predictive maintenance (2)breakdown maintenance (3) preventive maintenance (4)engine overhaul **161.** Following should be used for tightening engine cylinder head bolts : (1)Torque wrench (2)**Ring** spanners (3)**Open-ended** spanners (4)Allen wrenches 162. The term CAN, with reference to automotive electronics, stands for **Controllable Artificial Networks** (1)(2)**Computer Assisted Networks** (3)**Controller Area Networks** (4) None of the above _____ is the principal ingredient used in commercial catalysts to remove NO. 163. ____ Aluminium Rhodium (1)(2)None of the above (3)Platinum (4)164. A diesel engine has excessive black smoke when started in the morning. Which of these could be the cause ? A restricted fuel filter (1) A bad fuel injector nozzle (2)A blocked fuel tank vent A leaking fuel return line (3)(4) SPACE FOR ROUGH WORK P.T.O.

RDM 26 Α v165. Clashing of gears when shifting into high could result from engine misalignment **(2)** a defective synchronise (1)drive key sheared None of the above (3)(4) 166. Air resistance to a car at 20 km/hr is R. The air resistance at 40 km/hr would be (4) R^2 4R (1) R (2)2R (3) **167.** Catalytic converter trouble is indicated by high CO and HC levels in the exhaust gas (1)(2)a rotten egg smell high engine noise level (3) (4) low $H_{2}O$ level in the exhaust gas τ. 168. Back-fire can take place in both the intake and exhaust manifolds (1)(2)only in the exhaust manifold (3) only in the crank case (4) only in the intake manifold 169. The carbon from cylinder head is removed with **(2)** Hammer (1)Scraper Caustic soda (3)Water (4) 170. Third party insurance safeguards the interest of third party only driver only (1)**(2)** owner, third party and vehicle (3)driver and third party (4) 171. The validity of insurance registration and age of vehicle are respectively as (1)3 years, life time (2) 1 year, 15 years (3)5 years, 10 years (4) Life time (any time), 20 years 172. India started to adopt European emission norms in the year 2000 (2)2001 (3)1999 (4) 2002 (1)SPACE FOR ROUGH WORK

'सूचना - (पृष्ठ 1 वरून पुढे....)

- (8) प्रश्नपुस्तिकेमध्ये विहित केलेल्या विशिष्ट जागीच कच्चे काम (रफ वर्क) करावे. प्रश्नपुस्तिकेव्यतिरिक्त उत्तरपत्रिकेवर वा इतर कागदावर कच्चे काम केल्यास ते कॉपी करण्याच्या उद्देशाने केले आहे, असे मानले जाईल व त्यानुसार उमेदवारावर शासनाने जारी केलेल्या ''परीक्षांमध्ये होणाऱ्या गैरप्रकारांना प्रतिबंध करण्याबाबतचे अधिनियम-82'' यातील तरतुदीनुसार कारवाई करण्यात येईल व दोषी व्यक्ती कमाल एक वर्षाच्या कारावासाच्या आणि/किंवा रुपये एक हजार रकमेच्या दंडाच्या शिक्षेस पात्र होईल.
- (9) सदर प्रश्नपत्रिकेसाठी आयोगाने विहित केलेली वेळ संपल्यानंतर उमेदवाराला ही प्रश्नपुस्तिका स्वतः बरोबर परीक्षाकक्षाबाहेर घेऊन जाण्यास परवानगी आहे. मात्र परीक्षाकक्षाबाहेर जाण्यापूर्वी उमेदवाराने आपल्या उत्तरपत्रिकेचा भाग-1 समवेक्षकाकडे न विसरता परत करणे आवश्यक आहे.

नमुना प्रश्न

प्रश्न क. 201. The Catch varies inversely with the size of the : (1) nozzle (2) droplet (3) obstruction (4) sprayer ह्या प्रश्नाचे योग्य उत्तर "(3) obstruction" हे आहे. त्यामुळे य़ा प्रश्नाचे उत्तर "(3)" होईल, आता खालीलप्रमाणे प्र.क्र. 201 समोरील उत्तर-क्रमांक "³" चा कंस खालीलप्रमाणे पूर्णपणे छायांकित करून दाखविणे आवश्यक आहे.

प्र.क. 201. 1 2 • 4

अशा पद्धतीने प्रस्तुत प्रश्नपुस्तिकेतील प्रत्येक प्रश्नाचा तुमचा उत्तरक्रमांक हा तुम्हाला स्वतंत्ररीत्या पुरविलेल्या उत्तरपत्रिकेवरील त्या त्या प्रश्नक्रमांकासमोरील संबंधित वर्तुळ पूर्णपणे छायांकित करून दाखवावा. ह्याकरिता फक्त काळ्या शाईचे बॉलपेन वापरावे, पेन्सिल वा शाईचे पेन वापरू नये.
